

EMERGENCY FIRST RESPONSE

Emergency First Response is PADI's first aid and CPR course. It teaches you to provide emergency care for someone in need and is based on internationally recognised medical guidelines for emergency care. This course is suitable for divers and non divers.

We also run the **HSE Emergency First Aid at Work** Course for those requiring a formal qualification for their workplace.

To qualify as a PADI Rescue Diver, Divemaster, or Instructor you need to have current CPR training and the first part of this course fulfils this requirement.

There are two parts to the course:

Emergency First Response Primary Care (CPR)

Emergency First Response Secondary Care (First Aid)

COURSE DESCRIPTION

Primary Care: Scene assessment, barrier use, primary assessment, adult CPR, serious bleeding management, shock management, spinal injury management, automated external defibrillator orientation, conscious choking adult, emergency oxygen use.

Secondary Care: Injury assessment, illness assessment, bandaging, splinting for dislocations and fractures.

Scenario Practice

You then put all you have learned to practice by applying the skills to realistic situations.

PREREQUISITES

You will need to read through the workbook, and complete the knowledge reviews in the workbook before starting the course.
